Summary: An aspiring web developer with 3 months of hands-on experience developing responsive, user-friendly web applications. Worked on real-world projects from animated landing pages, full-stack dashboards, Twitter-integrated platforms, to blockchain-powered tools using React, Next.js, Node.js, GSAP, and more.

Work experience:

React.js Developer

Quadb Tech | Remote, India | Mar 2025 - June 2025

- Built and shipped a fully responsive, modern web interface from scratch using React and Next.js, improving user flow and interface consistency.
- Developed real-time features by integrating the Twitter API, enabling live user activity tracking for the platform.
- Worked closely with backend developers and the product team to bridge UI/UX expectations with clean, functional code.

Projects:

GenMol.ai - AI-Powered Molecular Research SaaS • [GitHub](#)

- Developed a full-stack SaaS platform that allows researchers to generate, visualize, and analyze molecules using **SMILES notation** and **NVIDIA AI**.
 - Built secure user auth with **NextAuth** (email verification, password reset) and REST APIs with **MongoDB/Mongoose**.
- Tech Stack:** Next.js, React, TypeScript, MongoDB, Mongoose, RDKit, NextAuth, REST API, NVIDIA AI

CancAI - AI-Powered Cancer Treatment App • [GitHub](#)

- Built a web app to detect cancer screening gaps from medical records and suggest personalized treatment using Gemini AI.
- Tech Stack:** React, Next.js, TypeScript, Tailwind, Gemini AI, Drizzle ORM

DecentraPay - Blockchain Payment Gateway • [GitHub](#)

- Developed a secure crypto payment platform with custom smart contracts and wallet integration on Ethereum.
- Tech Stack:** Solidity, Node.js, Express, React, MongoDB

Skills:

Languages - HTML, CSS, JSX, TSX, Javascript, Typescript, SASS
Frameworks - React.js, Next.js, Node.js, Express.js
Libraries - GSAP, Framer Motion
Databases - MongoDB, SQL
Tools - Git, npm, npx, Webpack, MongoDB, PostgreSQL, Postman

Education:

Viva Institute of Technology (VIT)

Master of Computer Applications (MCA)
Virar - 2023 - Present | Current CGPA: 8.8/10

Certifications:

Front-End Software Engineering Job Simulation - Skyscanner (via Forage) |  [Link](#)
JavaScript Certification - HackerRank |  [Link](#)
Data Structures & Algorithms with Java - Apna College |  [Link](#)

Achievements:

Final Round Runner-up, *DECODEX 2025* - National-level Hackathon (cleared Level 1 qualifier among top participants)
Ranked 5, *LUMA AI Hackathon* - Organized by GDSC, 2024 edition
Ranked 22, *AceHack 3.0 - Jaipur* - National-level Hackathon
